## ERRATUM

To add some value to the "Cahiers", we have thought that it would be interesting, in the near future, to be able to post an *electronic version* of each issue on Internet some months after its paper publication. With this aim, beginning with the preceding issue, we have adopted a new method for printing the papers directly from a pdf file rather than from a hard copy. This method requires some manipulation to have the text perfectly centred and to add heads and page numbers to the files given by the authors.

However, as I did not have a sufficient command of this process, an important *error* has occurred in one of the papers printed in Volume XLVII-2: the first line of each page of Nishimura's paper (pages 130-154) has been erroneously suppressed, so that this paper cannot be correctly understood. Thus we have decided to reprint it in the current issue.

I am very sorry for this error of which I am entirely responsible (I should have checked the proofs more cautiously!) and I present all my excuses to the readers and ask their forgiveness for the inconvenience of receiving a defectively printed paper and for having one less new paper to read in this issue. Naturally I'll make sure that such an error does not occur in the future.

Andrée C. Ehresmann
